

PCB WASH & IONIC CONTAMINATION TESTING

In order to meet your high quality PCB cleaning requirements, we offer our m.b.tech NC25 Micro Phase Cleaning system.

SPECIFICATIONS & FEATURES

Model Name:	NC25 Micro Phase Cleaning System
System Features:	80 litre cleaning solution capacity
	Can use Zestron FA+ or Vigon cleaning solutions
	PCB Holder Frame with quick locking system
	Automatic Frame Transfer
	Permanent water conductivity control with alarm on rinsing tanks
	Residues separated by a patented filtering system
	Vacuum drying in aluminium tank with forced convection

For Ionic Contamination or 'Cleanliness' Testing, we offer our CM60 Contaminometer utilising a unique Volumetric Measurement Cell.

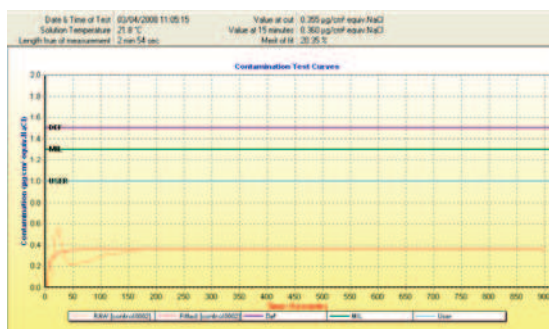

SPECIFICATIONS & FEATURES

Model Name:	CM60 Ionic Contamination Tester
Test Tank:	500mm (19.7") x 350mm (13.8") x 60mm (2.4")
Measurement Range:	0.01 ~ 30 ug/cm ² NaCl equivalence
Sensitivity:	< 0.25% of measurement range
Precision & Repeatability:	Better than +/-2% of range for maximum PCB surface
Solution:	50% or 75% v/v reagent grade 2-propanol in de-ionised water
Max Liquid Volume:	25 litres
	Measures contamination as cleanliness levels in accordance with IPC / ANSI-J-STD001D and UK DEF-STD

ABOUT AXIOM MANUFACTURING SERVICES

Axiom Manufacturing Services focuses on providing **contract electronic manufacturing services (EMS)** to original equipment manufacturers (OEM's) who do not want to manufacture some or all of their products in house.

A complete range of **electronics manufacturing services** are available from design support, prototyping, new product introduction, PCB assembly, sub assembly, product assembly, test, warehousing and logistics through to aftermarket services which includes repair and rework.

Our focus is on working in partnership with our customers, **providing a total electronics manufacturing solution**. We work with you to help you to retain your competitive edge and profitability. Axiom delivers value throughout the supply chain, whilst helping to lower your total acquisition costs.
